Module coverage against the 61-module ERP checklist

This document checks Vidyalaya against a typical full-suite school ERP module list: 22 core, 17 standard, 10 premium and 12 ultimate modules. Each row names the screen where the feature lives.

Status:

- **Built:** it was already in the product before 18 October 2026.
- **Added:** it was built on 18 October 2026.
- **Extended:** part of it existed, and the missing part was added.

Every row marked Added or Extended is covered by `tests/api/gap-features.ts` (216 checks) and the unit tests.

Summary:

- **All 61 items** are now covered.
- **31** were already built.
- **26** were added.
- **4** were extended.

Core modules (22)

Module	Status	Where
Multiple dashboards	Built	Dashboard, per role: owner, principal, teacher, accountant, front office, parent, student
News management	Built + Added	Noticeboard (built); **News & Blog** with review and a public news page (added)
Timetable	Built	Timetable, with clash detection
Student admission	Built	Admissions: enquiry CRM, online form, applications pipeline
Messaging system	Built	Messages (in-app chat)
Student attendance	Built	Attendance: daily, card scan, registers, absence alerts
Courses and batches	Built	Classes & Subjects: classes, sections, subjects, teacher allocation
Human resources	Built	Employees, Staff Attendance, Leave, Payroll
Finance	Built	Fees, Accounts, Payroll
Examination	Built	Exams & Results, Class Tests, Question Papers
User management	Built	Staff and student logins, Roles & Permissions
Report center	Built + Extended	Reports, plus the **Report builder** (added)
Employee / teacher login	Built	Role-based staff logins
Students / parents login	Built	Family portal with child switcher
Student information	Built	Student profile (360° view)
Custom student remarks	**Extended**	**Report-card remarks** with a school remark bank, printed on the report card; general remarks per student
Certificate generator	Built	Certificates, with QR verification
ID card generator	Built	Certificates & ID cards
SMS integration	Built	SMS, WhatsApp & Email (MSG91, Twilio, DLT templates)
School / events calendar	Built	Calendar & Events
Advance fees	**Added**	Fees: overpayment kept as advance and used automatically; on/off switch
Gradebook	**Added**	Exams → **Gradebook**: weighted results across exams, with grade and rank

Standard modules (17)

Module	Status	Where
Hostel / dormitory	Built	Hostel: rooms, beds, allocation, fee on invoice
Instant fees	**Added**	Fees → Invoices → **Instant invoice**: one-off charges for students, a class or a section
Library	Built + Extended	Library, plus **book import**
Data management	**Extended**	**Data export**: the owner downloads every record as Excel; imports with row-by-row checking
Email integration	**Added**	SMTP set-up with a test email; **Email** channel for bulk messages and reminders
Transportation	Built	Transport and live GPS tracking
Custom import	**Extended**	Student import (built); **staff, books, fee dues and past receipts** (added)
Blog	**Added**	News & Blog
Poll	**Added**	**Polls & Forms**
Custom report	**Added**	Reports → **Report builder**: choose the source, columns and filters; save and share
Theme	Built	School Settings → branding palette, logo, dark mode
Placement	**Added**	**Placements**: drives, eligibility, applications, selection alerts
Gallery	**Added**	**Gallery**: albums, bulk photo upload, staff-only albums
Task	**Added**	**Tasks**: multiple assignees, progress roll-up, comments
Inventory	Built	Assets & Inventory; Store & POS
Discussion	**Added**	**Discussions**: audience-limited forums with moderation
Discipline	**Added**	**Discipline**: incident register with parent sharing

Premium modules (10)

Module	Status	Where
Data export	**Added**	Owner-only full Excel export; CSV export on every list
Tally integration	Built	Accounts → Tally XML (ledgers and vouchers)
Payment gateway integration	Built	Razorpay: UPI, cards, net banking, webhooks
Student assignment management	Built	Homework with online submissions
Fees import	**Added**	Fees → Invoices → **Import**: opening dues and past receipts
Google SSO	**Added**	Sign in with Google Workspace, limited to the school's domain
Form builder	**Added**	Polls & Forms: 7 question types, anonymous option, export
Reminder	**Added**	**Reminders**: scheduled or repeating, by app, phone, SMS or email
App frame	**Added**	**Apps**: the school's other web tools inside the app, per role
Enquiry & registration	Built	Admissions CRM and public application form

Ultimate modules (12)

Module	Status	Where
Alumni	**Added**	**Alumni**: directory, import of former students, public self-registration
Audit	Built	Audit Log
Azure integration	**Added**	Sign in with Microsoft 365 / Azure AD (Entra ID)
Doc manager	**Added**	**Document Manager**: folders, sharing by role, versions, renewal alerts
Automatic timetable generator	Built	Timetable → Auto-generate
Paybooks integration	**Added**	Payroll → **Paybooks**: employee master and monthly attendance with loss-of-pay days (file import)
Gate management	**Added**	**Gate & Visitors**: visitor register and passes, student gate passes with parent alerts
Google Docs	**Extended**	Study material shows Google Docs, Sheets, Slides, Forms, Drive and YouTube previews in the app
Online examination	**Added**	**Online Exams**: timed, shuffled, auto-marked, teacher marks written answers, results review
QuickBooks integration	**Added**	Accounts → **QuickBooks**: journal CSV for QuickBooks Online and IIF for QuickBooks Desktop
Google Meet integration	Built	Live Classes: Google Meet, Zoom, Teams, Jitsi
BigBlueButton integration	**Added**	Live Classes on the school's own BigBlueButton server, with personal signed links

What is configurable

Each school controls the new features without code changes:

- **Modules:** every new module can be switched off per school in Roles & Permissions, and rights can be set per role.
- **Plans:** Starter, Growth and Enterprise include different modules (see `prisma/upgrade-plans.ts`).
- **School Settings:**

Settings tab	What can be changed
Fees & payments	Accept advance fees
SMS, WhatsApp & Email	SMTP server and sender
Integrations & data	Google / Microsoft sign-in and allowed domains; Apps; BigBlueButton; public news page; alumni self-registration; data export
Rules	Remark bank; discipline categories; gate-pass alerts to parents

Honest limits

- **Google/Microsoft sign-in and BigBlueButton** use the operator's OAuth apps and the school's own BBB server. They were verified with unit tests and configuration checks, not against the live services. Add the keys from `.env.example`.
- **Paybooks and QuickBooks** are file exports in their import formats, not live API connections. Paybooks' API needs a partner agreement.
- **Reminders** go out on time when a scheduler calls `/api/public/cron` every minute with `CRON_SECRET`. Without one, due reminders go out when anyone next uses the app.
- **Data export** covers up to 100,000 rows per table and excludes uploaded files. Larger schools need a database dump.
- **Placements** are aimed at senior classes. Most K-12 schools will switch this module off.
